Frinder

Behind The creation

Frinder

The Problem Frinder Solves

Billions are online, yet forming **real, non-romantic friendships** across cultures remains surprisingly hard. Most platforms blur friendship and romance, lack verification, or fail to enable genuine interest-based connection.

🚫 No Fake Accounts

Government ID verification required before any interaction

🌍 Global Discovery

Connect across 180+ countries by shared interests & languages

🚫 **Not promoting dating..... HOW ?**

🛡️ Safe by Design

Harassment-free, moderated environment with fraud detection

6-Step Registration Process

Every user completes a multi-step onboarding flow before gaining full platform access.

01

Basic Profile

Full name, DOB, email, phone, country, city, education, profession & interests

02

Account Credentials

Email & password setup with validation rules (8+ chars, uppercase, number)

03

Email Verification

6-digit OTP sent to confirm email address

04

Your Profile

Bio, education, profession, interests (min. 3), and native/learning languages

05

Identity Verification

Upload government-issued document (Passport, National ID, Driving License, Student ID, or SSN)

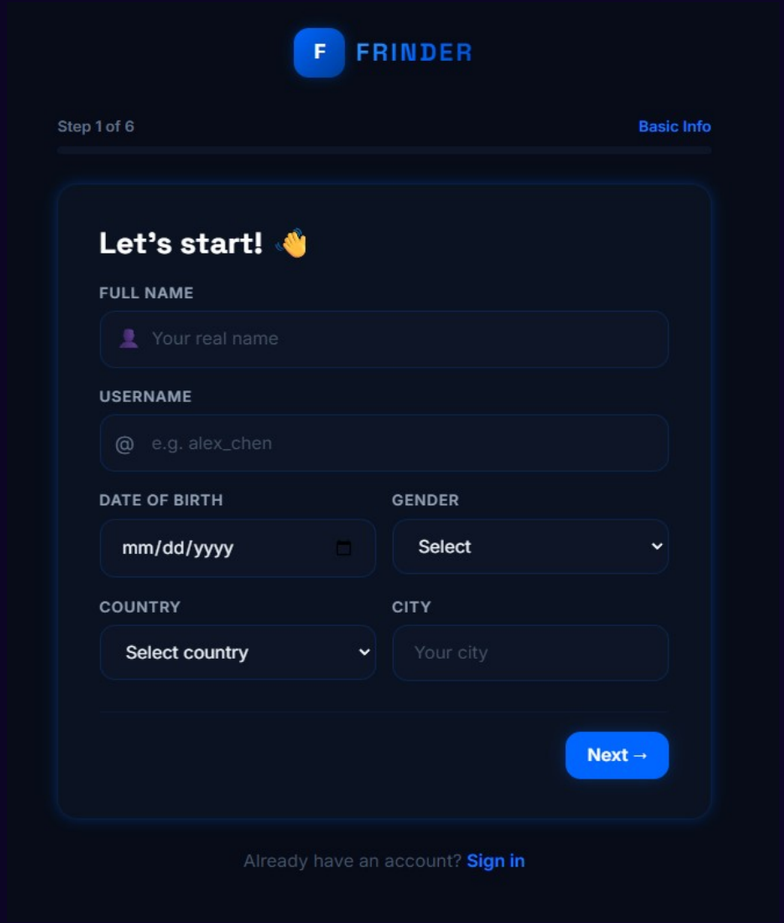
06

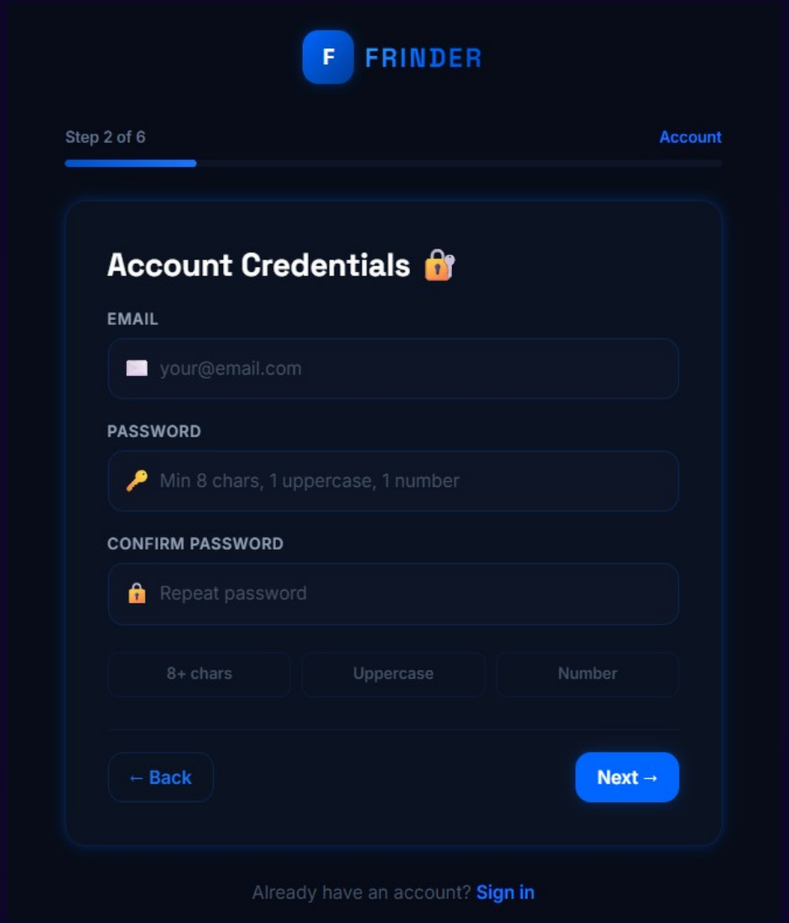
Live Selfie & GPS

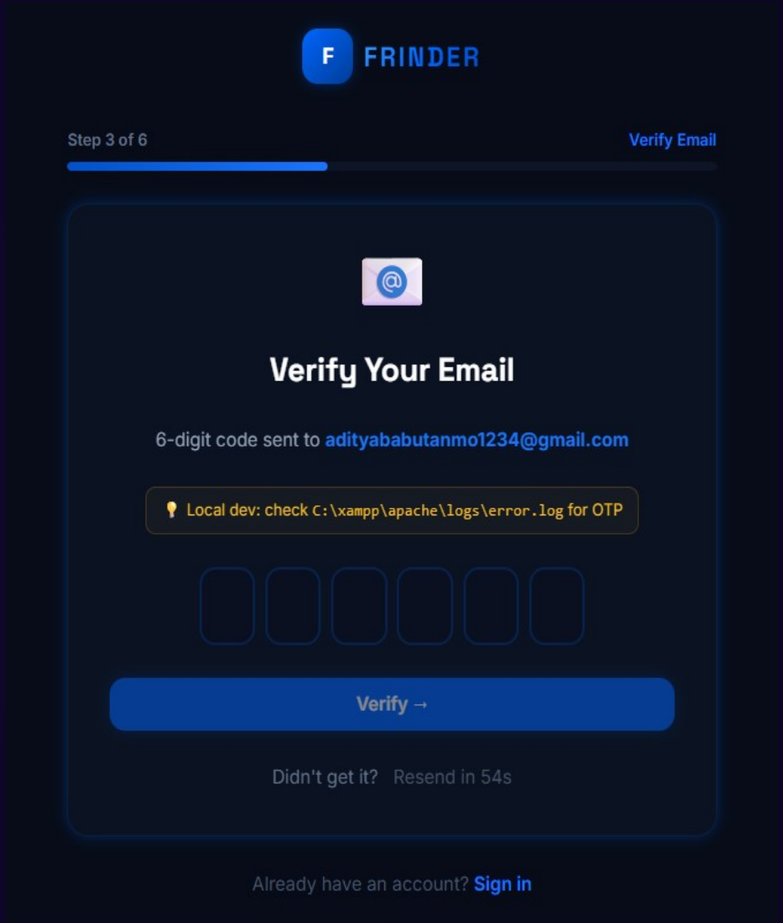
Capture live selfie + share location. Both optional but Boost verification score

ⓘ Accounts remain **Pending** until admin approval. **Verification score ≥ 80/100 required** for full access.

Account Creation







Identity Verification Svstem

Frinder's defining feature: a **5-layer verification engine** ensuring every account belongs to a real, traceable individual. No auto-approvals — every document is manually reviewed.

Location Verified — +20 pts

GPS cross-checked against declared country

Live Selfie — +30 pts

Browser Camera API capture, stored privately

Document Upload — +50pts

Government ID, Passport, or Student ID

Core Features

Identity Verification

Multi-layer ID check via National ID, Passport, or Student ID.

Global Friend Discovery

Filter by country, age, language, interests & online status

Real-Time Messaging

Instant chat with history, read receipts.

Events & Meetups

Groups, voice/video calls & real-world meetup planning

Friend Map

Interactive world map visualizing your global friendship network.

Friendship Milestones

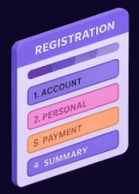
Gamified badges celebrating anniversaries, streaks & achievements

Frontend UI Highlights

Built with **React.js + Tailwind CSS + Framer Motion** — 9 fully animated pages with reusable components.

Animated Friend Cards

Hover lift, gradient border reveal, staggered fade-in on load



Multi-Step Registration

Animated step transitions, progress bar, validation shake on error

Chat Bubble Interface

Smooth bubble entry animations, typing dots & read receipt ticks

Friend Map

Global map visualizing friends by country and continent

Database Architecture

Frinder's MySQL database is designed to **Third Normal Form (3NF)** with enforced foreign keys, indexed columns, and 10 purpose-built relational tables.

users

Accounts, credentials & status

user_verification

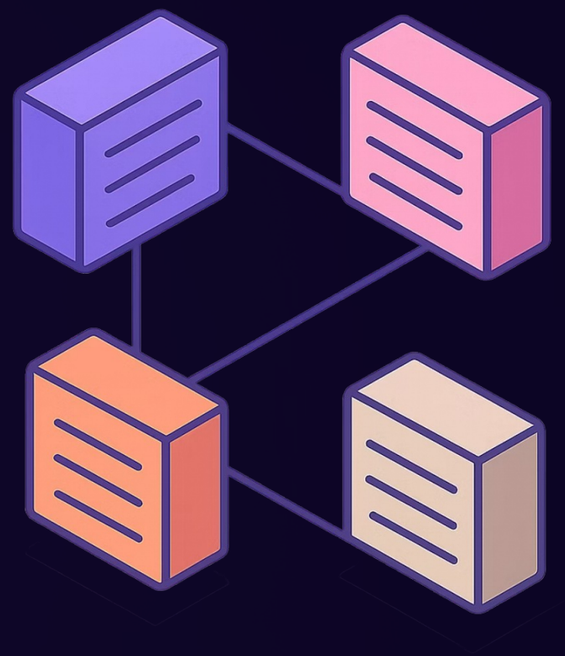
Selfie, docs & fraud score

friends & messages

Active friendships & chat

admin_users

Admin credentials & roles



What about Security?

Security & Protection

Password Hashing

All passwords hashed with bcrypt — plain-text never stored

Prepared SQL

PDO parameterized queries eliminate SQL injection risk

Fraud Detection

Flags duplicate devices, rapid registrations & location mismatches

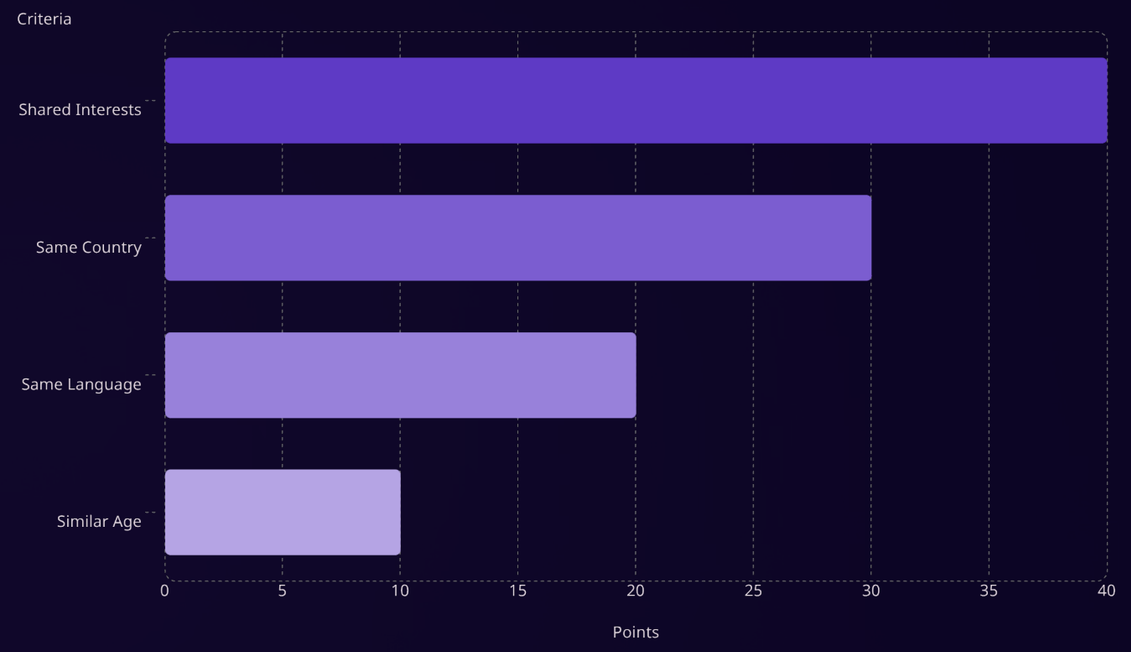
Admin Oversight

Every document manually reviewed — no auto-verification

Friend Recommendation Algorithm

Frinder calculates a **compatibility score (0–100)** between any two users based on four weighted criteria, ranking results from highest to lowest on the Discover page.

Matching Criteria	Weight	Signal
Shared Interests	+40 pts	Strongest signal
Same Country	+30 pts	Cultural context
Same Language	+20 pts	Communication ease
Similar Age (±5 yrs)	+10 pts	Life-stage relevance



Frinder 2.0 — Future Vision

Frinder is not just a university project — it is a **blueprint for a responsible, friendship-first social platform**. The roadmap ahead:

1. **AI-Powered Matching**
   ML-based compatibility using behavioral signals & conversation patterns
2. **Mobile Apps**
   Native iOS & Android apps with push notifications & offline support
3. **Community Hubs**
   Topic-based global communities with events, polls & shared experiences
4. **Global Impact**
   Partner with universities & NGOs to promote cross-cultural friendship
5. **Update the Absences**
   Update the calling feature, Map feature, etc.

> *"The world already has enough apps for romance. What it truly needs is more spaces for friendship."*
